

Espresso Machine Notes

L U C I

1. This machine will last as long as we make it last. Clean it and take care of it.
2. This machine only takes E.S.E. pods. Don't try and use loose grounds with it.
3. Make sure there is water in the tank.
4. Make sure there isn't too much water under the grill.
5. It can be dangerous to use this machine if you don't know what you are doing. High-pressure steam is not a game.
6. When you are done, clean the wand. Wipe down the space and turn off the machine.
