

The first five years....

The Laboratory for Ubiquitous Computing & Interaction (LUCI) is a leading research laboratory in the areas of ubiquitous computing and human-computer interaction. Established in 2004 in the Donald Bren School of Information and Computer Sciences at UCI, LUCI has grown to more than ten faculty and fifty graduate and undergraduate students and postdoctoral scholars, working in a dedicated facility in our new state of the art ICS building.

L U C I

LABORATORY FOR UBIQUITOUS COMPUTING AND INTERACTION

LUCI researchers are investigating topics such as:

technologies for health and wellness

privacy and security

green IT and sustainability

digital media and learning

location and context-awareness

assistive technologies

virtual worlds

access and participation in technology

In the last year, LUCI researchers have presented papers, posters, demonstrations, and keynote talks at major international research venues including the annual AAAI, AMIA, CHI, CSCW, OzCHI, Pervasive, and UBICOMP conferences.

After five successful years, we invite you to join us in developing the next phase of the LUCI research and educational agendas.

Your sponsorship at any level can support LUCI laboratory activities. For instance:

\$1000 pays for the "LUCI Lunch" seminars for a quarter.

\$2000 enables a student to attend a conference to present their research.

\$5000 provides seed funding for exploratory research for a new project.

\$12000 sponsors a graduate student researcher for one quarter.

\$20000 funds a diversity scholarship to attract top-quality, non-traditional students.

\$35000 equips our undergraduate teaching lab with state-of-the-art prototyping machinery.

\$50000 supports a year-long graduate student fellowship.

\$100000 creates a position for a postdoctoral researcher for a year.
